Davao City Smart City Projects

- Converged Command and Control Center

Develop technological solutions, like intelligent surveillance, to enable efficient inter-agency collaboration and upgraded communication capabilities for improved public safety and planning.

- Intelligent Transport and Traffic Systems and Security

Install sensors, equipment and infrastructure that support the operation of an intelligent traffic control system and public safety initiatives.

- Integrate the solutions developed for improved traffic and transport management with other security management systems.

Converged Command and Control Center UPDATES

City Government of Davao

Installed additional closed circuit television (CCTV) in the city for security and disaster resilience.

Provider

- The Department of Interior and Local Government (DILG) has selected Davao City as one of the pilot cities for the “SAFE Philippines” Project.
- The United States Trade and Development Agency (USTDA) has committed a funding grant for a feasibility study.

Current Challenges on the Project

- *Standards and inter-operability*
- *Technical competencies*
- *Financing/funding of projects*
- *Completion of project's feasibility study*

Needs to address

- Technical assistance
- Manpower skills development
- Participatory Governance and Partnership Options
