Umekita

-Osaka

Leading Project featuring “Integrated Hub for Green and Innovation” in Kansai Region transformed from former freight station (2005~)

Key Issue

- Right in front of Osaka Station which is one of the largest terminal station in west Japan with 2.5 mil. passengers a day
- Utilization of huge vacant land of relocated freight station and cargo yard

Project Approach

- A Large-scale redevelopment to enhance station front hub functions utilizing former freight station and cargo yard
- Land acquisition of the part of the site and infrastructure development through Land Readjustment by UR
- Construction of the large-scale public park for disaster risk reduction by UR and local government
- Introduction of innovative business, commercial, housing, R&D, etc. by private entities (PPP)

Area: 32.3ha

Role of UR: Implementor (Land Readjustment, Land Acquisition, Park Development)
