

Participants of JICA Peruvian TOD Program Learnt Minato Mirai 21 Redevelopment

On April 24, 2023, Mr YOSHIDA Masaki, Executive Director, International Business Department, UR held a lecture of Minato Mirai 21, Yokohama city to thirteen Peruvian participants of JICA Project for Enhancing Capacity of Transit Oriented Development . The area has been redeveloped by UR and local government since 1983 and the opening of the subway in 2004 made more walkable and attractive.

Participants are responsible for urban planning and transportation in Lima and Callao, where new subways are planned to solve the problems caused by rapid population increase.

Participants listening to lectures seriously

Mr. Yoshida defined about the objective, feature and effectiveness of Minato Mirai 21. Participants was very impressed and asked many questions such as methods of facilities transformation and construction, and project fund raising.

After the lecture, we went around Minato Mirai 21 by bus and walked through the main mall to the subway station and seaside.

Callao is located on the port, though participants showed great interest in the project. They will feedback this experience to their own project.

We are supporting developing countries by UR's various knowledge and technology through JICA programs.
