

Groundbreaking Ceremony Held for UR-Supported Dukuh Atas Pedestrian Deck Project in Jakarta

On June 21, 2026, a groundbreaking ceremony was held for the pedestrian deck that UR has supported in the Dukuh Atas area in central Jakarta, Republic of Indonesia.

The Dukuh Atas area is an important transport node where multiple public transportation systems converge. At the same time, pedestrian movement between stations has been fragmented by the river and the major road, creating challenges for smooth mobility.

To help realize a pedestrian deck that enables safe and seamless pedestrian movement, UR has supported the Jakarta Special Capital Region Government, MRT Jakarta (MRTJ), and other stakeholders through activities such as organizing and operating the Joint Coordination Meeting to facilitate consensus-building among relevant parties, as well as assisting with planning. These efforts helped advance the project and led to the commencement of construction.

From the Japanese side, the ceremony was attended by UR Associate Vice President Honiden, Chargé d’Affaires ad interim Myochin of the Embassy of Japan in Indonesia, and others.

Governor Pramono of the Special Capital Region of Jakarta expressed his appreciation for the support provided by Japan, including UR. He also expressed his expectation that the deck would connect six modes of transportation and contribute to the realization of seamless mobility.

A Japanese construction consultant is also participating in this project, making it an initiative that contributes to the overseas infrastructure development by Japanese companies, which our department aims to promote.

The ceremony was also covered by local media, demonstrating the strong interest in improving transport nodes and promoting TOD in central Jakarta.
